

MYOSA Project Submission Guidelines (For Participants)

This document outlines the **mandatory submission format and rules** that all participants must strictly follow while uploading their project to the official MYOSA GitHub repository. Submissions that do not follow this format may be **rejected or asked for resubmission**.

1. Submission Format (Mandatory)

Each participant/team must upload a **single Markdown (.md) file** following the exact structure below:

publishDate: YYYY-MM-DD

title: *Your Project Title*

excerpt: *Short 1–2 line description of your project*

image: *Project_Folder_Name /your-cover-image.jpg*

tags:

- *Tag1*
- *Tag2*
- *Tag3*

> One-line project tagline

Acknowledgements

Overview

Demo / Examples

Images

Videos

Features (Detailed)

Usage Instructions

Tech Stack

Requirements / Installation

File Structure (Optional)

License (Optional)

Contribution Notes (Optional)

2. Image Upload Rules

All images must: - Be placed in the **same folder** as your .md file - Use **JPG or PNG format only** - Be properly named (no spaces)

Correct Image Format

```
<p align="center">  
  <br/>  
  <i>Your image caption</i>  
</p>
```

3. Video Upload Rules (Important)

YouTube links are NOT allowed.

Participants must: - Upload their video as a **local .mp4 file** - Place it in the **same folder** as the markdown file

Correct Video Format

```
<video controls width="100%">  
  <source src="/your-video-name.mp4" type="video/mp4">  
</video>
```

4. Content Rules

Each project must clearly explain: - What the project does - How it works - Who it is for - What problem it solves

Must Include:

- Proper **overview**
- **Real images & demo video**
- **Tech stack used**
- **Working instructions**

5. Code & Technical Content

Participants may include: - Python, C/C++, JavaScript, or Embedded code - Installation commands

Correct Code Format

```
print("Hello MYOSA")
```

6. File & Folder Naming Rules

- No spaces in file names
- Use lowercase

Good Example:

```
myosa-smart-home.md  
myosa-demo.mp4  
myosa-dashboard.jpg
```

Bad Example:

```
My Project Final.md  
Demo Video.mp4
```

7. Common Mistakes That Lead to Rejection

Using YouTube links instead of local videos

Missing cover image

Not following the fixed markdown format

Poor explanation of project

Missing tech stack

Wrong file structure

8. Submission Checklist (Final)

Before submitting, confirm:

- Markdown file format followed
 - Images added correctly
 - MP4 video uploaded
 - Proper overview written
 - Tech stack added
 - Commands & code formatted correctly

9. Submission Responsibility

By submitting a project, the participant confirms that: - The work is **original** - The content follows **open-source ethics** - No copyrighted material is used without permission

10. Organizer Final Note

This format is **mandatory for all participants**. Failure to follow the guidelines may result in: - Rejection of submission - Request for resubmission - Disqualification in case of repeated violation

Sample Format:

publishDate: YYYY-MM-DDT00:00:00Z

title: Your Project Title

excerpt: A short 1–2 sentence summary describing what the project does.

image: your-cover-image.jpg # optional but recommended

tags:

- tag1

- tag2

- tag3

> A short tagline that summarizes the project in one sentence.

Acknowledgements (Optional)

If you want to thank a community, contributors, or mention an important update, write it here.

Overview

A clear explanation of what the project does, what problem it solves, or why it exists.

****Key features:****

* Feature 1

* Feature 2

* Feature 3

* Feature 4

Demo / Examples

****Images****

Place all images in the ****same folder**** as this markdown file.

Use this format:

```
<p align="center">  
  <br/>  
  <i>Short caption describing the image</i>  
</p>
```

****Videos****

Place your video in the same folder and use this format:

```
<video controls width="100%">  
  <source src="/video-name.mp4" type="video/mp4">  
</video>
```

Features (Detailed)

Explain in detail how the project works.

Break it into clear subsections like below.

****1. Feature Heading Example****

Explain the feature.

****2. Feature Heading Example****

Explain the feature.

****3. Feature Heading Example****

Explain the feature.

Add images or videos under each subsection if needed using the formats above.

Usage Instructions

Explain how others can use this project.

If there are commands, show them like this:

```
``plaintext  
python your_script.py --option value  
``
```

If there are scripts, use:

```
``python

# Example Python snippet

def example():

    print("Hello World")
...

---

## Tech Stack

* **Technology 1**

* **Technology 2**

* **Technology 3**

* **Technology 4**

---

## Requirements / Installation

List all dependencies clearly:

``bash

pip install dependency1 dependency2 dependency3
...

---

## File Structure (Optional)

...

/your-project
├─ file1.py
├─ folder/
│   └─ file2.jpg
└─ README.md
...

---

## License (Optional)

State your license here if applicable.
```

Contribution Notes (Optional)

Explain how people can contribute, open issues, or submit improvements.
